

The Polymer Chemistry and Materials Group of the Adolphe Merkle Institute (AMI) at the University of Fribourg, Switzerland invites applications for the position of

Post-Doctoral Researcher in Polymer Chemistry

Qualified applicants must have a Ph.D. Degree in Chemistry, Chemical Engineering, Materials Science, or Polymer Science and wish to pursue independent research involving small-molecule synthesis, polymer synthesis and characterization, and mechanical analysis.

Two positions are available as early as April 1st. The successful candidates will contribute to cutting-edge research focused on the synthesis and characterization of a new class of stimuli-responsive polymer adhesives. A strong background in organic or polymer synthesis and materials characterization is desirable. Successful candidates should be fluent in English, both written and oral communication. Close collaboration between other members of AMI, the Faculty of Sciences, and local companies is expected.

The Adolphe Merkle Institute at the University of Fribourg is a recently established center of competence, focused on research in the field of soft nanomaterials science and technology. With the objective to stimulate innovation, AMI aims to combine fundamental and application-oriented research within an interdisciplinary setting. AMI offers highly competitive working conditions, an outstanding infrastructure and a competitive salary.

Applications should include a CV, publication list, and the contact information of at least two references.
